

THE PATENTS ACT, 1970(39 of 1970)&THE PATENTS RULES, 2003 COMPLETE SPECIFICATION (See section 10 and rule 13)

TITLE OF THE INVENTION

Project BluePrint: Engineering Knowledge Hub and EdTech Framework

FIELD OF THE INVENTION

This invention relates to IoT-based agricultural systems for efficient irrigation management.

BACKGROUND OF THE INVENTION

Conventional irrigation methods result in inefficient water usage and require manual intervention.

OBJECTS OF THE INVENTION

To provide an automated irrigation system that reduces water wastage and improves crop yield.

SUMMARY OF THE INVENTION

The invention uses sensors, microcontrollers, and communication modules to automate irrigation.

BRIEF DESCRIPTION OF DRAWINGS

Fig. 1 shows the block diagram of the proposed system.

DETAILED DESCRIPTION OF THE INVENTION

The system consists of soil sensors, a microcontroller, communication module, and a water pump control system.

CLAIMS

1. A smart irrigation system comprising sensors, controller, communication module, and actuator.
2. The system of claim 1, wherein IoT enables remote monitoring.

ABSTRACT

An IoT-based irrigation system that automates water supply using sensor data to improve efficiency.
